About Us

To accomplish our mission to provide beautiful design plastic products to as many people as possible, it is essential for Elifplas Plastic to be involved in protecting the environment.

Elifplas Plastic's commitment to the planet is based on a simple idea; the most beautiful visual design solutions that will brighten up our home and our future are also those that have a lower environmental impact throughout their life-cycle.

In this sense, we must act to better use our natural resources by promoting conservation, encourage recycling and reuse of waste, minimize emissions and effluents into the atmosphere, while controlling risks related to industrial production. These principles have guided our company's actions since its inception. As a leader in our market, we fundamentally believe that we have a responsibility towards the protection of the environment to generate economic growth in harmony with respect for nature and in the spirit of a social responsible company.
